## Introduction

VHFP-30 supports AMD Ryzen<sup>™</sup> 2500U (quad-core) and V1605B (quad-core) and provides a complete PC platform with high performance. Coming from the embedded V1000 processor family and mobile processor family, these CPUs combine the incredible performance of the pioneering "Zen" architecture and "Vega" GPU in a single chip with thermal design power (TDP) as low as 12W/15W. This PC is equipped with two DDR4 SO-DIMM slots with a total maximum capacity of 32GB to add higher bandwidth and lower latencies for processes. And it also features 3×M.2 that support Wi-Fi, 4G module and NVMe SSD.

Two independent monitors are supported via the DP and HDMI2.0 ports. It also has rich interfaces including 4×USB2.0, 2×USB3.0, 1×COM, 1×Mic-in, 1×Line-out and 2×LAN, catering to most requirements in the market. This AMD Ryzen<sup>™</sup> system is an ideal integrated platform for various application as, but not limited to, automation, network security, communication and transportation.
